VOLUME 12 1984

SUBJECT INDEX

Acetylcholinesterase
  α-bungarotoxin binding sites, 83
  central cholinergic neurons, 95
  cholinergic neuronal systems, 543
  histochemistry, 543
  interpeduncular nucleus, 83
  Koelle method, 543
  muscarinic receptors, 83
  nucleus basalis, 95
  squirrel monkeys, 95
  substance P, 83
  thiocholine method, 543
AChE-synthesizing neurons, 635
  cholinergic projections
  main olfactory bulb, mice
Acquisition, 617
  avoidance
  extinction
  kainic acid
  lesions, ventromedial thalamic nucleus
  L-maze
$ACTH_{4-9}$, 369
  2-deoxyglucose
  ORG 2766
Acute-phase reaction, 689
  endogenous pyrogen
  fever
  glycoproteins
  guinea pigs
  prostaglandins
Adrenalectomy, 409
  blood pressure
  bradykinin
  heart rate
  preoptic area
Adrenergic receptor sites, 697
  Dahl rat
  hypertension
Adrenoreceptor development, 1
  cerebrum
  ionizing radiation
α_2-Adrenoreceptors, 393
  angiotensin II
  clonidine
  drinking
  phenylephrine
  yohimbine
Afferent connections, 629
  horseradish peroxidase
  main olfactory bulb, mice
Afterdischarge, 437
  epileptiform
  evoked potential
  naloxone
Aging, 453
  hypothalamus
  neural transplantation
  neuropeptides
  neurosecretion
Amacrine cells, 539
  corticotropin releasing factor
  ganglion cells
  retina
Amphetamine injections, nucleus accumbens, 203
  brain stimulation reward
  electrical stimulation, ventral tegmentum
  electrical stimulation, lateral hypothalamus
  morphine injections, ventral tegmentum
Amplitude, 589
  field potential
  population spike
  spike duration
  time integral
Analgesia, 487
  artificial metastases
  endogenous opiates
  β-endorphin
  nucleus of the raphe magnus
  stress
Anatomy, 711
  dentate gyrus
  hippocampus
Angiotensin II, 393
  α_2-adrenoreceptors
  clonidine
  drinking
  phenylephrine
  yohimbine
Anterior ectosylvian sulcus, 647
  cats
  ^{125}I-WGA autoradiography
  retinotopy
  tecto-thalamic connections
Anxiolytics, 741
  nonbenzodiazepines
  serotonin receptors
  TVX Q 7821
Apparatus
  digitizing pads, 597
  intracranial pressure continuous recorder, 581
  micropipette, 419
  microwave electrode, 441
  multiple layer Peltier device, 143
  push-pull cannula system, 123
  recording/perfusion cannulae, 275
  slide incubation chamber, 745
  stereotaxic head holder, 335, 585
  telemetry, 129
Artificial metastases, 487
  analgesia
  endogenous opiates
  β-endorphin
  nucleus of the raphe magnus
  stress
Aspartic acid, 625
  cerebral cortex
  frontal cortex
  GABA
D-aspartic acid, 5
  L-[^{3}H] glutamic acid
  L-[^{3}H] glutamine
  nucleus tractus solitarius
  push-pull cannula
  vaginal stimulation
Auditory pathway, 331
  deoxyglucose audoradiography
  gerbils
  ultrofilm ^{3}H
Autism, 17
  fenfluramine
  5-hydroxytryptophan
  serotonin
Autonomic nervous system, 209
  glutamatergic afferents
  heart rate
  kainic acid
  lateral septal nucleus
Avoidance, 617
  acquisition
  extinction
  kainic acid
  lesions, ventromedial thalamic nucleus
  L-maze
Awake preparation, 581
  behavioral response
  cats
  intracranial pressure
  ventricular pressure

Bar press feeding behavior, 441
  emotion
  monkeys
  orbitofrontal cortex
  single neuron activity
Basal forebrain, 493
  cats
  cerebral cortex
Behavioral inhibition, 63
  bulbar reticular formation
  electrical stimulation
  prefrontal cortex
Behavioral response, 581
  awake preparation
  cats
  intracranial pressure
  ventricular pressure
Benzodiazepine receptors, 215
  brain slices, mouse
  cerebellum
  [^{3}H]-flunitrazepam
Biogenic amine release, 23
  dopaminergic receptors
  phenelzine
  phenylethylamine
  striatum, rat
Bladder, 735
  cats
  nerve tracing
  urethra
Blood-brain barrier, 133
  cerebrovascular permeability
  nephrectomy
Blood pressure, 409
  adrenalectomy

bradykinin
heart rate
preoptic area
Body balance, 513
lesions, electrolytical
locomotor activity
nucleus reticularis tegmenti pontis
Body suspension, 29
lateral hypothalamic area
simulative hypogravic condition
single unit activity
Body temperature, 295
lesions, basal forebrain
sleep
thermoregulation
Body weight, 571
eating
insulin
Bovine, 275
electrical activity
urine
vomeronasal organ
Bradykinin, 409
adrenalectomy
blood pressure
heart rate
preoptic area
Brain
amygdala, 221, 227, 233, 363, 369
anterior ectosylvian sulcus, 647
anterior nuclei, 521
anterior olfactory nucleus, 669
area pyriformis, 629
anterior suprasylviare sulcus, 245
arcuate nucleus, 315
basal forebrain, 283, 295, 493
basal ganglia, 95, 387
blood-brain barrier, 133
brainstem, 95, 221, 227, 233, 373, 469, 559, 565
caudal thalamus, 647
caudate cortex, 559
caudate nucleus, 43, 95, 227, 559
cerebellar cortex, 33, 387
cerebellum, 215, 267, 369
cerebral cortex, 233, 339, 387, 493, 625, 629
cerebrum, 1
cingulate cortex, 369, 657
cortex, 647, 697
dentate gyrus, 323, 657, 711
diagonal band of Broca, 493, 669
diencephalon, 161
dorsal cochlear nucleus, 253
dorsal hippocampus, 369
dorsal root ganglia, 735
entorhinal cortex, 323, 369
forebrain, 233
frontal cortex, 369, 625
hippocampus, 209, 227, 233, 349, 387, 589, 559, 657, 703, 711, 741
hypothalamus, 151, 161, 227, 307, 315, 363, 369, 373, 377, 399, 409, 453, 555, 635, 689, 697, 721
indusium grisium, 657
inferior olive, 105
inferior mesenteric ganglion, 735
insular cortex, 221
interpeduncular nucleus, 83
intralaminar nuclei, 521
lateral hypothalamus, 29, 203
lateral septum, 209, 363
locus coeruleus, 565, 635
magnocellular preoptic nucleus, 635
medial forebrain bundle, 203
medial preoptic area, 295
medial septum, 493
median eminence, 453
medulla oblongata, 123, 697
mesencephalon, 369
midbrain, 267
midline nuclei, 521
nucleus accumbens, 203, 369
nucleus basalis, 635
nucleus basalis of Meynert, 283
nucleus of the lateral olfactory bulb, 669
nucleus olfactorius anterior, 629
nucleus of the raphe magnus, 487
nucleus reticularis gigantocellularis, 123
nucleus reticularis tegmenti pontis, 513
nucleus tractus solitarius, 5, 51
occipital cortex, 369
olfactory bulb, 529, 629, 635, 657, 669
olfactory tubercle, 369
orbitofrontal cortex, 381, 441
parafloccular lobule, 267
paraventricular nucleus, 453
parietal cortex, 369
pelvic plexus, 735
periaquaductal gray, 487
phrenic nucleus, 469
piriform cortex, 669
pons-medulla, 469
posterior sigmoid gyrus, 245
prefrontal cortex, 63, 283
preoptic area, 409
Purkinje cells, 387
pyriform cortex, 369
raphe nuclei, 565
retinohypothalamic pathway, 377
septum, 369
striatum, 23, 95, 209, 233, 369, 609
substantia innominata, 493
substantia nigra, 43, 479, 609
suprachiasmatic nucleus, 315, 377
thalamus, 233, 245, 369, 373, 521
vagus nerve, 529
ventral hippocampus, 369
ventral tegmentum, 203
ventrobasal nuclei, 521
ventrolateral nuclei, 521
ventromedial nuclei, 521
ventromedial thalamic nucleus, 617
ventromedial thalamus, 609
vomeronasal organ, 275
Brain catecholamines, 703
hippocampus
maze performance
norepinephrine uptake
strain differences
Brain catecholamine content, 363
estrous cycle
lordosis behavior
Brain glucagon-like materials, 373
glucago immunoreactivity
glucago-like immunoreactivity
synaptosome
Brain mechanisms, 167
eating
food selection
protein and carbohydrate intake regulation
Brain slices, mouse, 215
benzodiazepine receptors
cerebellum
[^{3}H]-flunitrazepam
Brainstem
cats, 469
horseradish peroxidase, 469
inbred mice, 565
locus coeruleus, 565
phrenic nucleus, 469
raphe nuclei, 565
respiratory neurones, 469
^{3}H-serotonin synthesis and release, 565
spinal projections, 469
Brain stimulation reward
amphetamine injections, nucleus accumbens, 203
electrical stimulation, ventral tegmentum, 203
electrical stimulation, lateral hypothalamus, 203
morphine injections, ventral tegmentum, 203
motivation, 195
neuroanatomy, 195
reinforcement, 195
Brown adipose tissue, 151
diet-induced thermogenesis
nonshivering thermogenesis
obesity
Bulbar reticular formation, 63
behavioral inhibition
electrical stimulation
prefrontal cortex
α-Bungarotoxin binding sites, 83
acetylcholinesterase
interpeduncular nucleus
muscarinic receptors
substance P
Bush baby, 283
nucleus basalis of Meynert
prefrontal cortex

Calcium binding protein, 71
calmodulin
cats
eating
satiety
Calmodulin, 71
calcium binding protein
cats
eating
satiety
Cancer, 425
corticotropin (ACTH)
luteinizing hormone-releasing hormone
melanocyte-stimulating hormone
myelin
Cats
anterior ectosylvian sulcus, 647
awake preparation, 581
basal forebrain, 493
behavioral response, 581
bladder, 735
brainstem, 469
calcium binding protein, 71
calmodulin, 71
caudate unit activity, 43
cerebral cortex, 493
drug interaction, 585
eating, 71
horseradish peroxidase, 245, 469
hypothalamus, 315, 721
immunohistochemistry, 721
intracranial pressure, 581
^{125}I-WGA autoradiography, 647
lesions, 6-OHDA, 43
lesions, substantia nigra, 43
magnocellular neuron, 721

monoamine oxydase, 721
nerve ending, 735
nicotine, 585
phrenic nucleus, 469
respiratory neurones, 469
retinotopy, 647
salivation, 585
satiety, 71
serotonin, 721
spinal projections, 469
tecto-thalamic connections, 647
thalamus, 245
urethra, 735
ventricular pressure, 581
vestibular projections, 245
VIP-like immunoreactive neurons, 315
Caudate unit activity, 43
cats
lesions, 6-OHDA
lesions, substantia nigra
Cell culture, 307
hypothalamus
reaggregate
vasopressin
Central cholinergic neurons, 95
acetylcholinesterase
nucleus basalis
squirrel monkeys
Centrally acting muscle relaxants, 479
dopaminergic neurons
substantia nigra
zoxazolamine
Centrifugal modulation, 529
evoked potential
olfactory bulb
olfactory system
vagus nerve
Cerebellar atrophy, 33
cytosine arabinoside
neurotoxic agent
noradrenergic fiber
Cerebellum, 215
benzodiazepine receptors
brain slices, mouse
[^{3}H]-flunitrazepam
Cerebral cortex
aspartic acid, 625
basal forebrain, 493
cats, 493
frontal cortex, 625
GABA, 625
Cerebrovascular permeability, 133
blood-brain barrier
nephrectomy
Cerebrum, 1
adrenoreceptor development
ionizing radiation
Chickens, 137
cyclic nucleotides
epilepsy
hereditary model
Cholinergic neuronal systems, 543
acetylcholinesterase
histochemistry
Koelle method
thiocholine method
Cholinergic projections, 635
AChE-synthesizing neurons
main olfactory bulb, mice
Chronic non-anaesthetized preparation, 577
geese
stereotaxic head holder
Clonidine, 393
α_2-adrenoceptors
angiotensin II
drinking
phenylephrine
yohimbine
CNS plasticity, 609
^{14}C-deoxyglycose method
extrapyramidal system
lesions, ventromedial thalamus
substantia nigra stimulation
Connections, 669
horseradish peroxidase
olfactory system, mice
wheat germ agglutinin
Core temperature, 355
hyperprolactinaemia
naloxone
restraint stress
Cortical mapping, 335
pantography
stereotaxic surgery
Corticosterone, 349
field potentials
hippocampus
modulation
steroid hormone
stress
Corticotropin (ACTH), 425
cancer
luteinizing hormone-releasing hormone
corticotropin (ACTH)
melanocyte-stimulating hormone
Corticotropin releasing factor, 539
amacrine cells
ganglion cells
retina
Cyclic nucleotides, 137
chickens
epilepsy
hereditary model
Cytoarchitecture, 521
nuclear parcellation
thalamus
Cytosine arabinoside, 33
cerebellar atrophy
neurotoxic agent
noradrenergic fiber

Dahl rat, 697
adrenergic receptor sites
hypertension
Data acquisition, 597
data analysis
digitizing pads
graphic data recording
Data analysis, 597
data acquisition
digitizing pads
graphic data recording
Deafferentation, 51
nodose ganglionectomy
nucleus tractus solitarius
somatostatin
Defensive aggression, 227
high performance liquid chromotography
monoamine levels
shock-induced fighting
Dentate gyrus
anatomy, 711
hippocampus, 711
horseradish peroxidase, 323
lesions, entorhinal cortex, 323
sprouting, 323
2-Deoxyglucose, 369
$ACTH_{4-9}$
ORG 2766
Deoxyglucose autoradiography, 331
auditory pathway
gerbils
ultrofilm ^{3}H
^{14}C-Deoxyglucose method, 609
CNS plasticity
extrapyramidal system
lesions, ventromedial thalamus
substantia nigra stimulation
Diabetes mellitus, 641
insulin
paradoxical sleep
route of administration
slow wave sleep
Diet-induced thermogenesis, 151
brown adipose tissue
nonshivering thermogenesis
obesity
Digitizing pads, 597
data acquisition
data analysis
graphic data recording
Dopaminergic neurons, 479
centrally acting muscle relaxants
substantia nigra
zoxazolamine
Dopaminergic receptors, 23
biogenic amine release
phenelzine
phenylethylamine
striatum, rat
Dorsal cochlear nucleus, 253
enkephalin
5-hydroxytryptamine
opossums
Dorsal hippocampal rudiment, 657
indusium grisium
olfactory system, mice
Timms histochemistry
Drinking
α_2-adrenoceptors, 393
angiotensin II, 393
clonidine, 393
estrous cycle, female rat, 175
fluid-electrolyte balance, 175
gonadal steroids, 175
phenylephrine, 393
yohimbine, 393
Drug
acetylcholinesterase, 543
actinomycin-D, 187
amphetamine, 203
anisomycin, 187
antazoline, 585
atropine, 585
bradykinin, 409
calcineurin, 71
calmodulin, 71
clonazepam, 215
clonidine, 393
cycloheximide, 187
cytosine arabinoside, 33
diazepam, 741
dopamine, 167, 479
endogenous pyrogen, 689
fenfluramine, 17
[^{3}H]-flunitrazepam, 215
hexamethonium, 585
5-hydroxytryptamine, 105, 167
5-hydroxytryptophan, 17
insulin, 571, 641
di-isopropylfluorophosphate, 543
kainic acid, 617
methylatropine, 409

methysergide, 585
metiamide, 11
morphine, 203, 359
naloxone, 355, 359, 437, 487
nicotine, 585
norepinephrine, 167
phenelzine, 23
phentolamine, 71
phenylephrine, 393
phenylethylamine, 23
practolol, 585
propranolol, 71
pyrilamine, 11
RO5-4864, 215
serotonin, 17
streptozotocin, 641
tritiatedproline, 339
troponin C, 71
TVX Q 7821, 741
yohimbine, 393, 585
zoxazolamine, 479
Drug interaction, 585
cats
nicotine
salivation

Eating
body weight, 571
brain mechanisms, 167
calcium binding protein, 71
calmodulin, 71
cats, 71
food selection, 167
glucose injection, 381
insulin, 571
monkeys, 381
neuronal activity, 381
orbitofrontal cortex, 381
protein and carbohydrate intake regulation, 167
satiety, 71, 381
EEG ontogeny, 77
glutamic acid
sleep rhythms
Electrical activity, 275
bovine
urine
vomeronasal organ
Electrical stimulation, 63
behavioral inhibition
bulbar reticular formation
prefrontal cortex
Electrical stimulation, lateral hypothalamus, 203
amphetamine injections, nucleus accumbens
brain stimulation reward
electrical stimulation, ventral tegmentum
morphine injections, ventral tegmentum
Electrical stimulation, ventral tegmentum, 203
amphetamine injections, nucleus accumbens
brain stimulation reward
electrical stimulation, lateraly hypothalamus
morphine injections, ventral tegmentum
Electrophysiologic identification, 267
midbrain
midvermis
paraflocculus

Electrophysiology, 115
habenular nuclei
neuroendocrine regulation
optic chiasma
pigeons
pineal gland
Emotion, 441
bar press feeding behavior
monkeys
orbitofrontal cortex
single neuron activity
Endogenous antipyresis, 161
febrile convulsions
fever
vasopressin
Endogenous opiates, 487
analgesia
artificial metastases
β-endorphin
nucleus of the raphe magnus
stress
Endogenous pyrogen, 689
acute-phase reaction
fever
glycoproteins
guinea pigs
prostaglandins
β-Endorphin, 487
analgesia
artificial metastases
endogenous opiates
nucleus of the raphe magnus
stress
Enkephalin, 253
dorsal cochlear nucleus
5-hydroxytryptamine
opossums
Met-enkephalin release, 123
noxious stimuli
nucleus reticularis gigantocellularis
push-pull perfusion
Epilepsy, 137
chickens
cyclic nucleotides
hereditary model
Epileptiform, 437
after discharge
evoked potential
naloxone
Estrogen-responsive neurons, 399
guinea pigs
hypothalamus, guinea pigs
LHRH neurons
luteinizing hormone-releasing hormone
Estrous cycle, 363
brain catecholamine content
lordosis behavior
Estrous cycle, female rat, 175
drinking
fluid-electrolyte balance
gonadal steroids
Evoked potential
afterdischarge, 437
centrifugal modulation, 529
epileptiform, 437
naloxone, 437
olfactory bulb, 529
